

# FORGOTTEN FLOWERS CENTERPIECE

Edgy yet elegant, a spray-painted black bouquet is just the touch any classy Halloween table needs. And because the flowers are artificial, they will never wilt, decompose or come back from the dead.

## You Will Need:

### From Savers/Value Village

- Faux flower bouquet, or assorted individual faux flower stems to create your own arrangement (silk or plastic flowers work best)
- Weathered and tarnished silver vase

### Other supplies

- Black matte spray paint

### Directions:

- 1) Dust off faux flowers and arrange into a bouquet design of your choice.
- 2) Spray with several light coats of black spray paint. Do not worry about having even color throughout – light and dark shading gives added appeal. Allow drying time between coats.
- 3) Once completely dry, place bouquet in vase and fluff to perfection.
